DETAILED ACTION

The preliminary amendment filed March 11, 2004, has been received and entered.

Claims 45 and 46 are presented for examination.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 45 and 46 are rejected under 35 U.S.C. 102(b) as being anticipated by Vandekerckhove et al (Glycobiology 2(6):541-548 (1992)).

Vandekerckhove discloses the preparation of α -2,3-sialyllactose by contacting lactose with α -2,3-trans-sialidase from *Trypanosoma cruzi*, an enzyme encompassed by the claims, in the presence of various sialyloligosaccharides. See, e.g., abstract, page 542 (Table 1). See also page 547, left column, paragraph entitled "Enzyme activity measurements", disclosing two procedures for the transfer of sialic acid to lactose, as well as the purification of the resulting product.

Art Unit: 1651

Vandekerckhove therefore anticipates the claims. Note that the α -2,3-sialyllactose prepared in the reference will be identical to that recited in the claims, despite the different starting material recited in the claims. A holding of anticipation is clearly required.

No claims are allowed.
